...Mrs. E. Kidder's Cholera, Dysentery, Diarrhœa Cordial,

Immediate and Perfect Remedy,

Cholera, Dysentery, Summer Complaints of Children, Diarrhœa, Sea Sickness, general Debility, &c.

WHERE this all powerful antidote is at hand, Cholera is no long[er] to be seriously feared, or look[ed] upon with terror—as this Cordial will most [as]suredly [ar]rest the disease in the course of a very few hours, if taken at the commencement—It has been before the public for more than seven[teen] years, and was the first article made known to the public as an

IMMEDIATE AND PERFECT CURE ...OF...

CHOLERA.

It has been thoroughly tested in every country and every clime, and its effects have everywhere proved the same.

SURE TO CURE,

even where the disease has advanced to its last stage

CHOLERA.

Accounts almost daily reach us of the ravages of the CHOLERA, both at home and abroad, and of the little success which has thus far attended the attempts to check its frightful inroads on human life.

Such being the fact, it surely may be regarded as an [im]portant discovery that a medicine has been discovered possessing the power of checking the progress of the Cholera, and eradicating it from the system.

Mrs. Kidder would most respectfully call the attention of the public to this invaluable medicine, known as her

"CHOLERA, DYSENTERY AND DIARRHŒA CORDIAL."

Many thousand lives have been saved by this medicine when the disease had advanced to its last stages.

It is hoped that every housekeeper will keep the Cordial at hand, and if timely administered but little danger is to be apprehended from an attack of the

Cholera, Dysentery or Diarrhœa.

This ordeal immediately checks the vomiting, relieves the pains, stops the Diarrhœa, and restores the bowels to a perfectly regular and healthy state however severe the attack may be, or however low the patient may have become it invariably restores.

The Severest Cases of Dysentery

are [re]moved by counteracted the pains allayed, the bowels [re]lieved and not unfrequently the bowels become perfectly regulated and restored in the short space of ten or twelve hours.

Chronic Diarrhœa,

Either in children or adults of months or years continuance comes most readily cured with this Cordial when standing [the]y may be reduced to mere skeletons, it immediately strengthens, and shortly restores them to perfect health.

Cholera Infantum.

It has saved the lives of many thousand children when [de]spaired of death's door by this complaint—it gives [im]mediate relief, and they very soon recover.

Sea Sickness.

It is a most pleasant and desirable remedy for Sea Sickness. It effects the vomiting and readily restrains the patient. It invariably checks vomiting [pro]duced from any cause whatever.

Children that are Teething,

of such [ad]ult to Diarrhœa, should always be provided with this medicine as it will keep the bowels regular and keep off the Cholera. It is a wholesome, safe and pleasant to the taste, and children are fond of it, and will take it without trouble or dislike.

For General Debility and Dyspepsia,

it is a most excellent restorative, giving a healthy tone to both the stomach and bowels, and prevents food from pressing or distressing the stomach.

The public may rest assured that it contains neither opium or mineral substances, or anything that can be the least injurious to the constitution.

CAUTION.

Be sure that you obtain MRS E KIDDER'S CHOLERA MORBUS DYSENTERY and DIARRHŒA CORDIAL, and you will get the only true and original article which has ever been in the United States or Europe, and which has ever effected a cure.

It is put up in bottles holding nearly a quart intended for family use, and sold at One Dollar per bottle.

Patent Bedstead.

THE Subscribers have purchased the right of manufacturing and vending HINKLEY'S IMPROVED PATENT BEDSTEAD for the city of Bangor.

This improvement is simple in its construction and consists in furnishing a substantial Bottom to Bedsteads, which shall be elastic and have all the advantages of a Slat, or Sacking Bedstead, while at the same time it serves to secure the posts and rails compactly together without other aid. It can be fitted to any Bedstead, *old* or *new*, with much less time and labor than is required to put in a cord, and when fitted, gives *great strength* and support and keeps the Bedstead in proper shape. It cannot be doubted that this simple improvement will when known take the place of every other method now in use. We can confidently recommend the above improvement to our customers and to the public as the cheapest most substantial and best Patent Bedstead ever invented.

The Public are respectfully invited to call and see for themselves. SHAW & MERRILL,

Holden's Alterative and TONIC MIXTURE,

Is the best combination known for changing the unhealthy secretions of the Stomach and giving strength to that organ, and for curing many troubles which are often ill treated in quantity of the blood.

Its action is that of a Tonic Alterative and Diuretic, restoring at the same time strength to the stomach and giving a healthy evacuation, at the same time leaving behind any unpleasant effect on the constitution.

By its use the appetite becomes regular and good, digestion perfect, sick headache and many nervous disturbances growing out of imperfect digestion are generally cured persons of debilitated constitutions become healthy, and strong by its use.

By reason of the sympathy between the stomach and the skin many diseases of the latter grow out of a morbid action of the former even when the ordinary symptoms of Dyspepsia are wanting and are cured by the use of the latter.

Many troubled with children supposed to arise from worms are relieved by a dose or two of this medicine. Infants and children who are rapidly losing flesh, pine away, become peevish and fretful, will find in this medicine a sure remedy. Persons of all ages troubled with Costiveness, Piles, Jaundice, Rheumatism, Scrofula, Ulcers, Eruptions on the skin, Female Complaints, Nervousness, Sick Headache, Dizziness, Loss of Appetite, Sour Stomach, Flatulency, Heartburn, Sick Stomach, Dysentery, Diarrhœa, Colic, Cholera Morbus, Cholera Infantum, Fever and Ague, Fever Sores, Erysipelas, Canker, Salt Rheum, Ringworm, Tetter, Scald Head, Chilblains, Chapped Hands, Sore Lips, Sore Eyes, Worms and Worm Fever, Colds, Coughs, Sore Throat, Influenza, Whooping Cough, Croup, Asthma, Bronchitis, Consumption, Liver Complaint, Dropsy, Gout, Rheumatism, Neuralgia, Tic Doloreux, Erysipelas, Scurvy, Mercurial Disease, Female Weakness, Irregularities, Suppression, Whites, Barrenness, Impotency, Nervous Debility, Seminal Weakness, Involuntary Discharges, Pain in the Back, Kidneys, Loins, Bladder, Gravel, Stone in the Bladder, Inflammation of the Bladder, Urinary Diseases, Stricture, Gleet, Syphilis, Mercurial Disease, Blood Poisoning, Ulcers, Fever Sores, Scrofula, Scurvy, Erysipelas, Eruptions on the Skin, Boils, Blotches, Pimples, Tetter, Ringworm, Scald Head, Salt Rheum

Cholera.

To the Editor of the Whig and Courier

It is to be feared that the prevailing excitement in regard to Cholera is ill calculated to lead one to a correct and safe mode of treatment

Let us review the symptoms of the present Epidemic as they have occurred in this city, and endeavor from these positive *symptoms* to establish a sure *mode of treatment* leaving the doubtful questions to be settled by further experience of the disease

The *positive symptoms* so far as they have been observed are the following —

Arrest of the urinary secretions and, consequently, the retention in the blood of Urea one of the most injurious products of the waste of the animal system a cessation of the biliary function, as appears by the morbid color of the discharges, sense of great heat and intense thirst, showing evidently, that nature requires an increase of fluid to dilute this retained poison in the blood —as well as to supply the waste which is produced by the attempts she makes to relieve the system, by substituting for the proper discharge of the kidneys and skin, a discharge from the stomach and bowels in the form of the discharge of vomiting and liquid stools —the mucous membrane is thus, evidently thrown into a congested condition, —a reduction of animal temperature a disturbed action of the nervous system manifesting itself by spasmodic cramps the consequences evidently, of the former morbid conditions

The common sense indications of the foregoing conditions would be first, to economise the animal heat by surrounding the body with woolen cloth ing, that being, of course, a much poorer conductor of heat than cotton; and if necessary to supply that heat by external artificial warmth in the most convenient and effectual method, as by warm water baths or the use of lime, in a manner hereafter be described, —this will also fulfil another indication, —restoring the function of the skin, and promoting its natural discharges, thereby relieving the more important internal organs, and this indication will be aided by the use of astringents, to allay the nervous irritation by the use of anti spasmodics opium, ether &c in small and frequently repeated doses avoiding if possible, the use of powerful stimulants so as not to aggravate that congested state of the mucous membrane which has so often the constant accompaniment of the cases observed in this city to allow the patient to drink ice water in small frequently repeated quantities, guarding against overloading the stomach, to endeavor establish the urinary secretion by the use of such ice such as Nitrous Ether, Spirits of Turpentine Acetate of Potash —in such quantities as will not increase the irritable condition of the stomach —together with the application of irritant Ammonia and Spts Turpentine for instance over the region of the kidneys after the more urgent and alarming symptoms have been allayed it will be indicated to restore the biliary function by the frequently repeated administration of small doses of Calomel and lastly we must economise the strength of the system by disturbing the patient as little as possible and allowing such quantities of mild liquid food as the desire of the patient and the state of the stomach will bear

With regard to the use of diffusible stimulants such as the various preparations of alcohol &c we consider them admissible only in the collapsed stage, as they cannot be used at any other period without aggravating one or more of its *positive conditions*

Taking now the mode of treatment in review we will rank the agents according to their relative importance —warm bath and other warm external applications ice water and spasmodics nitrogenate, diuretics calomel

The following, is the best method of using lime for the purpose above mentioned —Take lumps of lime of a convenient size envelope them in clothes saturated with warm water and put them into bed with the patient The water will speedily become converted into steam by the slaking of the lime producing any requisite amount of heat

Many mercenary persons taking advantage of the state of excitement now prevailing are exposing for sale and recommending, one this specific, and another that, each of which has performed its many cures Now if there is a rational way of treating this disease, that way must be pursued with agents o whose qualities we have knowledge, and it is plain, that a blind use of empiric preparations is anything but proceeding according to reason and common sense

These remarks are based upon the close observation of the disease as it has occurred in this city, and our belief in their truth has been strengthened by the few recoveries which have taken place

D. McR

☞A counter irritant is just now much needed in our community The mind is too much in a morbid state which lowers the tone of the system and produces derangement in all the functions of the body and thus renders it liable to diseases of all kinds A special effort should be made to maintain a cheerful spirit and to do no violation to the everyday modes of thought and of living on the part of those who usually govern their appetites and live temperately —The fact is that will only a few rare exceptions the Cholera in this city has been confined to the foreign population who have lived in bad locations and under unhealthful influences Avoid excess of drugging, avoid excesses of all kinds, preserve the general and even flow of the spirits and thus, best fulfil the mission of life and be best prepared to meet all its issues,

We wish Dan Amburgh a great Caravan would come here now or a public wire dancer, or some great ludicrous show—something to amuse our people, to make them indignant or in some way to arrest their attention, occupy their minds and divert their feelings We are not heartless in this either, but sincerely believe, just now in the good effect arising from something of the sort

Daring Robbery.

A very bold, daring, and hazardous robbery was committed on Thursday night August 23d by some person entering the dwelling house of the editor of this paper and taking therefrom a portion of his clothing and a silver watch The back door of the house was forced open and three rooms passed through, and the clothing and watch taken from a sleeping room in which a night lamp was burning A portion of the clothing, after the pockets had been rifled of a silver pencil case and gold pen, and a few dollars in change, was left in the garden A black broadcloth coat, partially worn, together with the watch and the articles from the pockets were carried away

The robbers probably anticipated securing a larger booty in getting possession of a key which they supposed we kept in our pocket but to this they were disappointed

This subject has been in the hands of the Police officers for several days, but so far, without their being able to get any clue to the robbery and we have felt it a duty to make the same publicly known in order to give the community warning of the existence here of daring robbers, that they may be prepared to secure their dwellings against being entered and be in readiness to give the robbers an unlooked for reception — We offer a reward of twenty dollars for the restoration of the property, and twenty dollars for the conviction of the robbers

Trouble in the Camp—Dissention and Coalition—"Bargain and Corruption."

Mr Emerson—

Among the political phenomena of the times may be numbered the doings of the Locofocos of the Representative class composed of Levant, Hermon, Glenburn, and Kirkland at their Convention last Saturday, and since at the equally coarse action which comprised a full delegation of their own, with the exception of Levant, which was filled up, the sturdy 'Old Hunkers,' the only unchanging politicians of the party, and always faithful and true to the party, were triumphant and successful in nominating at the second ballot, Alfred W. Leavitt, of Levant— This was a dreadful bitter pill, too bitter to be swallowed by the tyrannous democracy There first ex-Sheriff P. Crosby, the defeated candidate, and a *progressive free soil Jeffersonian Hamlinite* and others raised their old and stale cry, so often used against the Whigs, of "bribery and corruption —and charging the regular nomination to trickery and cheating, forthwith called another convention, which was held last evening in the same line and place of the Liberty Convention

The bargain having been made and the terms all satisfactorily arranged, the Liberty folks nominated Greenleaf Wing for their candidate, and the seceding progressives proceeded forthwith to adopt him as theirs This was closed with a great display of preamble and resolutions which will hereafter be regarded as one of those partisan papers which are only produced in stirring and eventful times

But who is Greenleaf Wing, the man who by the wire pulling of a few long faced political hypocrites of the Liberty or Freesoil party, has thus been thrust upon them? He was, up to very day of his nomination a *Hunker* of the ultra kind He *voted for Cass* and declared that was *impossible* for him to vote for any other man

Now when a nefarious and shameful band of politicians propose to *trade* for him, a voucher is found for him in the person of Elder Ariel Ward a former butter boy who declares that he was a true freesoiler, and is thus, against the *expressed* wishes of some real "freesoilers, thrust upon them for their votes With the prospect of a seat in the Legislature, a new and wonderful light has broken in upon his political vision Last fall, and for nearly twelve months since a Cass democrat and now a freesoiler

Whether such a barefaced political act of knavery and fraud such bargain and corruption shall succeed in that Representative class remains to be seen

CLEVELAND, OHIO, Aug 25, 1849

To the Editor of the Whig and Courier.

Having a little leisure just now, and feeling some symptoms of *ennui* approaching, the thought occurred to me that I might while away an hour or two in writing a letter to the 'Whig and Courier,' that old familiar sheet which I used to peruse with so much interest in my earlier days Possibly, thought I, such a communication would be accepted by the editor

Nothing is so much talked of here at present as Cholera No doubt you have seen frequent reports of the ravages of that disease in Ohio for the last two or three months, especially, of late, at Sandusky The mortality there has been, indeed, frightful It pounced upon them at once, taking thirty, forty, and fifty a day — The inhabitants, terror stricken, fled to the country, carring in some instances their nearest relations and friends dying upon their beds The population of some five or six thousand, was reduced in a few days to so many hundreds — There were not well or enough left behind to take care of the sick and bury the dead In their distress they telegraphed to this city for help — A company of Sermon going men volunteered at once to go to their relief and not one of those noble fellows, if and God, fell victims to the disease It has now abated, and the inhabitants are returning to their homes

The Cleveland Board of Health for the last month has reported from three to seven deaths by Cholera per day, but no alarm has been felt, and our physicians express the belief, that it will not prevail here, as it has in many other places, it being a remarkable dry and healthful location

Cleveland is truly a beautiful place It is a little less in area than Bangor, having at present about 14 thousand inhabitants Its elevation above the water of Lake Erie is a little rising 100 feet to which it is slightly inclined The streets are very wide and laid out with great regularity and planted with shade trees, chiefly elm and maple which grow very rapidly, the soil being excellently adapted to their thrifty growth

Their dark and dense foliage looks beautifully at this season of the year, and completely hides full half the dwellings from the view There is a public square in the heart of the city of about ten acres This also is beautifully shaded — The public houses are excellent The Weddell, in appearance, rather surpasses the Bangor, and the 'American,' perhaps, falls but a little short of it A railroad connecting this place with Columbus and Cincinnati is in rapid progress, and this end of the route will be ready for the cars in November next Another road to Pittsburg has recently been determined upon, and the work is to commence immediately

I perceive that the Maine folks are determined to push that iron track along the Kennebec to Canada Well, it is a grand enterprise and I rejoice at it Your connection, by this road, with Canada and the great West through the St Lawrence will give you an immense commercial advantage—an advantage, scarcely equalled by any other State in New England, more especially should 'Free Trade' doctrines prevail

A cargo of mackerel arrived here the other day from Halifax, and the importers, after paying a duty of 69 cents on a barrel, can afford to sell cheaper than any others who have transported them through New York, the usual route

In reference to the crops here this fall, I will just say that wheat has come off rather lighter than anticipated some time since, yet the quantity sown, having been so much greater than in previous years the amount harvested will probably not fall short of last year's growth

Corn looks well, and there is now a fair prospect of a heavy crop

There were but few potatoes planted, owing to so many failures for a number of years past by the 'potato rot' I have not heard that this disease has yet made its appearance,

Tuesday I made an excursion into the country to what is called 'Little Mountain.' A full grown mountain, you must know, in Ohio, is never heard of, and even little mountains are extremely rare and attain unto Ira Yankee had one of those 'Blue Hills on the Penobscot well planted here, he would certainly make his fortune on a short time The 'Little Mountain,' to which I first alluded was sort of Saratoga resort for the people hereabouts It is situated in the very garden of the Western Reserve, about 30 miles east of Cleveland and 10 miles from the Lake It is the highest land in the State being 600 feet above the level of Lake Erie and a little less than 1200 feet above the ocean Out the ocean level plain of some 40 or 50 acres, covered by a thin sandy soil, supporting a thick growth of pine and hemlock which presents a pleasing and striking contrast with the foliage of the surrounding country where these beautiful evergreens make no part of the forest The whole mountain bears strong evidence of having passed through diluvial convulsions in its day for it is literally rent in twain from the top to the bottom' Yawning gaps and deep chasms are been in every direction Our party descended into one of them 40 or 50 feet, and then passed along horizontally two or three hundred feet; much of the way being barely sufficient room to crowd the body between the gaping rocks, and so dark that it was necessary to carry torches to light up the passage I noticed numerous boulders of granite scattered in the plain at the base, though the mountain itself belongs to the Old Sand Stone Formation They are evidently strangers in this land, as no primitive rock has ever been broken through the strata here which lies above it They probably came from the southern side of the Lake where granite makes its appearance in enormous masses The summit of this mountain, perhaps, was an island when the rest of the State was covered by water tumbling, and drifting the sand and gravel over its surface

From the balcony of the 'Mountain House, the excellent little Hotel here, we looked out upon Lake Erie stretching away towards Her Majesty Dominion, and we could descry, far out to sea, here and there a sail spread to the breeze, and nearer inland the belching smoke from the await gliding steamers But I know I have already made this letter too long for your patience, so here I will abruptly close

DR. PEARSON'S CARMINATIVE BALSAM.

Great Cholera Preventive.

THIS article should be in the possession of every person travelling It has never been known to fail of producing the happiest results in cases of Cholera Morbus Diarrhœa, &c and has during the prevalence of the CHOLERA in this country been performing unlimited Cures—though it is recommended more particularly as a PREVENTIVE but is useful in any stage of the complaint If taken immediately upon the appearance of the Diarrhœa—which is a premonitory symptom of Cholera—an attack of this fearful and fatal disease may be prevented. In Cholera Morbus and Summer Complaints of children, it has no equal Dr P has made use of this remedy in his practice for near 20 years, with the most remarkable success. Price only 25 cents per bottle

It is decidedly the most beneficial remedy for the cure of Dysentery, Cholera Morbus and Summer Complaint, that is known to man Parents would find it the best medicine that can be used for young children and infants And every person who is travelling in the summer months should not be without a bottle of it in their possession, as it is an infallible remedy against the change produced in the system by drinking bad water

We annex the following certificate of Mrs A H Sanford, of New York, in reference to the Carminative Balsam We might add a long list, but consider it unnecessary

This is to certify that I have used Dr Pearson's Carminative Balsam and confidently believe it to be the best medicine that can be used for the young children while it is recommended to all ladies who are traveling in the summer months, and mothers for the fretting and crying of infants for which it is a certain cure

NEW AND

Important Discovery

GRAY HAIR can be restored to its original color or whether Auburn Brown or Black in a few days, Light or Red Hair can be changed to any darker shade, surpassing in beauty even the most natural locks, returning the gloss and softness of the original Hair, by using O M Ballard's

Permanent Liquid Hair Dye,

Of one preparation which is entirely different from all other preparations of Hair Dye now before the public It is free from all injurious properties, which can be tested by taking a lock of the finest and most delicate Hair of an infant, and color it with the Dye, which will not impair its gloss or its texture in the slightest degree, which is the best evidence which can be given that it is not injurious On the contrary, it improves the lustre of the Hair, promotes its growth, and prevents it from falling out and unlike other preparations, after the Hair is colored and dry, will not crock, fade, or wash out

In short, from its peculiar delicacy, softness, and easy application, it is worthy the attention of all who may wish to improve the color of the Hair, as it will make any shade, from a white to a jet black It is now used to an unaccountable extent, by persons who have prematurely turned gray, and others whose Hair is of no desirable color, which they restore or exchange for a beautiful Auburn, Brown or Black, without any additional preparation or the slightest trouble

N. H. DOWN'S

Vegetable Balsamic Elixir.

The Great Northern Remedy for Consumption!

ALSO, the most efficacious remedy in the world, for *Colds Coughs Whooping Cough Croup or Quinsy, Asthma, Pain in the Side or Stomach*, and all diseases of the LUNGS AND LIVER

This medicine is purely vegetable, and is by far the most effectual medicine known for all diseases affecting the pulmonary organs

Its effect upon the patient is most marked, and differs from that of most medicines recommended for the same complaints, in the following particulars

1st—It never irritates the organs it should soothe—never dries up the cough, leaving the cause untouched—but first *loosens the cough, increases the expectoration or spitting*, then removes the cause, *exhausting it completely* from the system, when as a matter of course, the *cough ceases*, and the patient is well

2d—It never produces costiveness in the consumptive patient—on the contrary, it has a laxative effect and is a moderate cathartic—which by the world to produce a ease of costiveness is never at but that in two or three weeks (the patient in the mean time having proper regard to diet) it will entirely remove it, and produce a healthy action of the bowels

3d—It does not produce a *dryness of the skin* but is a powerful promoter b' *sensible and insensible perspiration*, thus expelling by the pores of the skin, those nauseous fluids and impurities of the blood, and purifying that which in the system is the *direct precursor of DISEASE SICKNESS AND DEATH*

We do not pretend that DOWN'S ELIXIR is a specific for all the ills that flesh is heir to, but we do say and can confirm by incontestable evidence, that it

CONSUMPTION.

And all all diseases of the *lungs, the liver, and the pulmonary organs* it is *unrivalled—unequalled*—Its SUCCESS has been so great in curing [illegible] pronounced from us as CONSUMPTION IN ITS TIMELY GRAVE, and hundreds who *delayed too long its use*, have found in the advanced state of their disease, that RELIEF FROM SUFFERING, which they had vainly sought from every other source

This INVALUABLE MEDICINE is *highly concentrated* and put up in 2 oz and 4½ oz bottles, at fifty cents and a dollar per bottle, and each bottle warranted to contain more than [illegible] times as much by measure as any [illegible] Principal Office, 370 Washington Street, Boston
